

Beaconsfield Constituency

**Berkshire
Buckinghamshire
& Oxfordshire
Wildlife Trust**

In this constituency, there are:

- over 2,550 BBOWT members
- 32 Local Wildlife Sites (608 Ha)

Contains Ordnance Survey OpenData and public sector information licensed under the Open Government Licence v3.0. Contains data © TVERC, BMERC.

Nature in the constituency

Although the constituency nestles in the heart of the Chilterns, only 3.1% of the area is protected as Sites of Special Scientific Interest (SSSI), the designation given to the best examples of nationally important habitats compared with 8% of England. However, they are phenomenally rich in wildlife. Yet, as the State of Nature reports highlight, wildlife across England, including this constituency, is in severe decline.

The River Wye, which runs through this constituency, is also classified as being in poor ecological condition.

Burnham Beeches

Burnham Beeches is a National Nature Reserve noted for its ancient beech and oak pollards, and the range of flora and fauna associated with old trees and decaying wood. Burnham Beeches is protected by international law as a Special Area of Conservation (SAC).

Special Streams

The Trust is a partner in the Chilterns Chalk Streams project. These streams are fed from the groundwater held in the chalk of the Chiltern Hills. They provide a

precious habitat that supports a huge range of wildlife. Many chalk streams across the three counties are subject to dangerous levels of pollution, which is why BBOWT is calling for them to receive special legal protection.

Mid-Colne Valley

This 80 ha SSSI is renowned for the diversity of breeding wetland birds and the number of wintering waterbirds. The HS2 route will cross this wildlife haven on a viaduct bisecting Broadwater Lake nature reserve.

There are 46 Wildlife Trusts across the UK working towards nature's recovery. The Wildlife Trusts are a grassroots movement of people from a wide range of backgrounds and all walks of life, who believe that we need nature and nature needs us.

Working for wildlife

Local Nature Recovery Strategies (LNRS)

LNRS will set out priorities for nature's recovery, map the most valuable existing areas for nature and map specific proposals for creating or improving habitat for nature and wider environmental goals in each of 48 areas in England. BBOWT is working with local authorities and other organisations on preparing LNRS across our three counties.

#teamWILDER

#teamWILDER is a rapidly growing movement of people who care about our environment and want to help wildlife thrive. Through #teamWILDER we are empowering communities to act for a wilder future. If 1 in 4 people takes visible action for nature, we will create the social tipping point required to reverse nature's devastating decline. People are stepping forward from every sector of society to lead change in their fields and we welcome farmers, businesses, schools, politicians, and individuals as part of #teamWILDER.

“Volunteering with BBOWT nourishes the soul and helps maintain a balance in my life”

About BBOWT

BBOWT has a vision of a wilder Berks, Bucks and Oxon, with more nature everywhere, for everyone. Our aim is to create bigger, wilder, connected landscapes, where wildlife can thrive. We want to put nature into recovery, with 30% of land in our three counties well managed for wildlife by 2030.

Our mission is to bring about nature's recovery through local action, empowering more people to connect with their local wildlife and take action to save it.

We work to manage habitats to tackle the nature and climate crisis locally. We also help give nature a voice in major planning or policy decisions that threaten nature's recovery.

Our five priorities for the next government

- 1. Bring back the UK's lost wildlife** – BBOWT's Water Vole Recovery Project has already helped to increase the local range of water voles by more than 50 per cent over the past 15 years.
- 2. End river pollution and water scarcity** – BBOWT has joined a Wildlife Trusts' campaign calling on Government to create new bespoke legal protections for these habitats.
- 3. Fund wildlife-friendly farming** – BBOWT works with farmers across the three counties who prove that wildlife-friendly farming is possible and profitable.
- 4. Enable healthy communities** – BBOWT works with urban communities in Bicester, Banbury, Slough and Reading to help people and nature thrive together.
- 5. Tackle the climate emergency** – BBOWT's Chimney Meadows nature reserve project will help store more carbon than other habitats.
